

Greetings Champion!

Blessings and increase to you in the mighty name of Jesus!

It came into my heart to utilize the month of July to share with you some of the most important principles of life and faith that I have received. I hope you enjoy the nuggets of success that have blessed my life.

The goal is always to *become more* as a person. When you *become more*, you can then *do more*, and *have more*, which will enable you to *love more*, and *help more*.

The reverse of that process is also true. It works both ways. By *doing more*, *having more*, *loving more*, and *helping more*, contributes to you becoming more. It's an amazing, ever increasing cycle of personal growth and personal contributions to others.

Part of *becoming more* is achieved by doing interesting things and having dramatic, life-changing, moving experiences outside your normal routine, that causes personal growth and advancement.

If we defined "*risk*" as "*the likelihood of an irreversible negative outcome*," then inaction is the greatest risk of all, because it can only produce an irreversible negative outcome.

Don't just live a tolerable and comfortable existence doing something unfulfilling. Really live! Destroy forever all your assumptions about what can and cannot be done and what you can and cannot do, and have.

Each path of increase and *becoming more* begins with the same step: replacing assumptions.

Possibility is the gift greater than all others,

Pastor Glen
