

Greetings Champion!

Blessings and increase, power, might and dominion be yours in the name of Jesus!

Have you ever noticed that most people's current results are typically not the results they really want?

Most people are ready for something more and something different—but don't know how to produce the more and different they desire.

Most people's thinking and decision making is based on their past and current results and belief system; not their potential, not truth, and not their real destiny.

Worry, envy, jealousy, strife, anger, unforgiveness, and just plain negative thinking, are non-conductors of positive spiritual energy.

God cannot give you any greater blessing than you can believe Him for. He wants to give you great things, but even He cannot make you receive anything greater than you are equipped to receive. Renewing your mind and thinking differently than you thought in the past is what equips you to receive from God and life.

It's time to think big about your big God. It's time to believe God for big things and live a bigger life!

When it comes to your thinking: out with the negative and in with the positive, because what you think about you bring about.

God wants only good for you, so think good and speak good always,

Pastor Glen
