

Greetings Champion!

The blessing of the Lord that makes you rich, comes to you in Jesus' name (Proverbs 10:22)!

Now that you are God's child and the sin problem is no longer an issue, and you have already been given eternal life and Heaven as your future home, you must school yourself to think and believe that *God's number one desire for you is to prosper financially*, as shown in hundreds of verses.

Regardless of how many raises and promotions you get on the job, real prosperity will not be possible for you and the Deuteronomy 6:10-11 blessings cannot be your experience until you develop the *mindset* of prosperity based on God's word.

Prosperity may not be your experience or what you have seen demonstrated in your family or been taught. Nevertheless the fact remains, God promised financial prosperity to every believer many more times than He promised anything else in the Bible, even forgiveness of sins, His love, and Heaven.

Even though financial prosperity is *God's will* for *ALL* of His children, only a very small percentage of the Christian population currently enjoy extraordinary wealth.

The good news is, that can change for you!

It is time to receive the instructions on how you, too, can reap the abundant harvest of "The Blessing," that includes supernatural supply, and the wealth and riches that God promised and intends for you to have.

Be Warned! Prosperity will never be your experience if you are unwilling to be "*open-minded*" about changing the way you currently think regarding prosperity.

What you must get comfortable with is that prosperity and being more blessed than you currently are, has to do with changing your thinking, first of all.

Start marking all the prosperity verses you find in the Bible, or get my prosperity Scripture cards, prosperity CD, and my booklet "Confession Keys That Unlock Prosperity." These tools will fill your mind with hundreds of verses proving beyond a shadow of a doubt that it is God's will to prosper His people...YOU!

Thrive while you're alive,

Pastor Glen
