

Greetings Champion!

*"The blessing of the Lord, it makes you rich, and he adds no sorrow with it"* (Proverbs 10:22).

I want to talk to you about "The Power of Positive Self-Correction."

When a pilot flies an airplane, there is a compass or computer in the plane that tells him when he is off course (which is much of the time). This is his signal to make a correction in the direction the plane is heading.

If he doesn't make the correction, he will end up someplace other than his desired destination, or worse, end up crashing the plane. In like manner, we must make some corrections when it comes to our thoughts.

At first, it will seem like continuous corrections are necessary to keep your mind on profitable things and away from worry.

The beginning process is hard work and where many people become overwhelmed and quit the process of changing their thinking. For this reason, their lives never change or improve.

Part of *"fighting the good fight of faith"* is the fight that is involved in taking control over what you think, and thinking positively, in-line with God's Word.

Those who discontinue the process of *renewing their mind* with the Word of God doom themselves to a mediocre life. The process of mind renewal will eventually produce the abundant blessings God has promised. So don't stop!

Fight the good fight of faith,

Pastor Glen
