

Greetings Champion!

*"The blessing of the Lord is making you rich, and God is adding no sorrow with it" (Proverbs 10:22).*

I want to share with you about thought frequency.

Think of having two radio towers. One tower sends out only positive messages and is only capable of receiving positive, constructive, wholesome and beneficial things back in return.

The other tower sends out only negative and harmful messages and is only capable of receiving negative, noxious, and harmful things back in return.

Now suppose that electricity must pass through an A/B switch and can only power one of the two towers at a time.

What you choose to think and believe is like the switch that controls where the power goes.

Are you sending thought-power to the tower that produces only beneficial things or does it go to the tower that only produces calamity?

What you give thought and attention to – you give power to.

By positive self-correction, you cut the power to the *"what I don't want tower,"* and send power to the *"what I do want tower."*

The power to create good things (the creative power of God in you) stops when you worry. In a worried mental atmosphere, all you are capable of creating are only things you really don't want.

Worry is such a powerful and creative force that it renders the Word of God and your mind incapable of creating or producing what God promised and you desire.

*"And the cares, worries, and anxieties (wrong thoughts) of this world enter in, and choke the word, and it becomes unfruitful" (Mark 4:19).*

Think on beneficial things,

Pastor Glen
