

Greetings Champion!

Blessings and increase, and power and might, and dominion be to you in the mighty name of Jesus!

It's the prevailing thoughts that get manifested. Your meditation becomes your manifestation. What you think about most often will become your experience (Joshua 1:8).

For example, if you are thinking about money, you may *think* you are just thinking about money. But there are really two ways you can think about money. You either think you have plenty of it, so no problem, or worry about not having enough, and that is a problem.

As you have already learned, when you feel negative emotion about anything, it is because you are *worrying* or you are focused on the *lack* of something. In this case, not having money.

So, the process of *Positive Self-Correction* is to stop and replace thoughts that can only produce *unwanted results* with thoughts designed to give you what you want, which means *good results*.

In your thought life, you should cast down the negative thoughts of lack and limitation, and mentally affirm, "*I choose to acknowledge and think about the fact that my God is supplying all of my needs according to Philippians 4:19.*"

A statement such as this will assist you when you notice you are worrying and dwelling on negative things.

A bigger life comes from better thoughts,

Pastor Glen
