

Greetings Champion!

Confess *"God is pouring upon me so many blessings, there is not room enough to take them all in"* (Malachi 3:10).

As you might know, I have been sharing with you some of the principles that spoke to my heart that I recorded in a journal I created 10 years ago. I have already shared 49 principles with you and want to continue. Be blessed!

- When you are clear about the effect you want, you will discover the cause.
- Most high school and college students are busy working the **cause** that will result in a 9 to 5 life of unhappy work, and not the **effect** they desire.
- Don't endeavor to be a pioneer from the start. Do what others did first and profit from it. When you get their good results, then pioneer.
- Discover what it is in your personality that is keeping you from what you want. Is it your thoughts, attitudes, false beliefs, negativity, victim mentality, what you talk about, or body language that's sending the wrong messages to others?
- If you don't have what you want, it could be because you're not yet who **you** need to be in order to have it.
- Being influential makes the difference in manifesting your dreams.
- Self-confidence makes people attractive. Our thoughts control our confidence level and attractiveness level. If you act confident you will be attractive.
- Money comes by 80% influence and 20% discipline.
- Master the art of influencing others and opportunities and money will flow.
- Every time you do something repeatedly, the easier it gets. Practice being confident, friendly, encouraging, influential, and comfortable around people, and those attributes will get easier for you.
